

A LOOK AT ASSESSMENT PRACTICES

Effective special educators understand that students with disabilities are complex learners who have unique needs that exist alongside their strengths. Effective special education teachers also understand those strengths and needs.

HLP4

Use multiple sources of information to develop a comprehensive understanding of a student's strengths and needs.

HLP5

Interpret and communicate assessment information with stakeholders to collaboratively design and implement educational programs.

HLP6

Use student assessment data, analyze instructional practices, and make necessary adjustments that improve student outcomes.

Effective instruction for students with disabilities depends on teachers who are adept at using assessment data to inform, guide, evaluate, and adjust instruction.
